

STAND FAN

ASSEMBLING INSTRUCTIONS

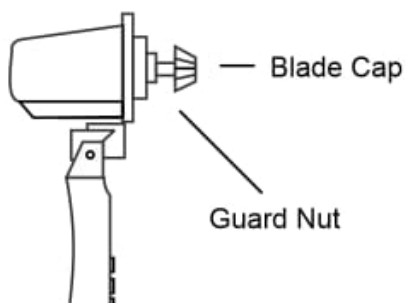

1. Unscrew out-joint, pull the extension pole out of the pole, and tighten the out-joint again.
2. Put the Base cover on the base and ensure firmness.
3. Insert the Pole in the provision made on the Stand Cover and Base. Add the Stainless steel underneath the Base then tighten with the Allen key.
4. Place the Control box firmly on top of the Extension pole, tighten Screw B with a Screw driver.

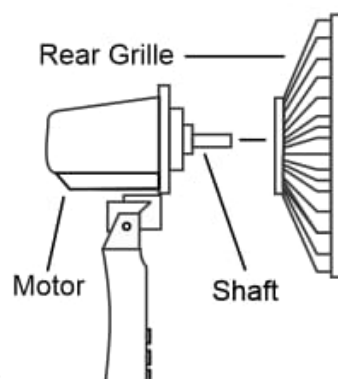

For Remote Control:

1. Remove the cover from the back of the remote and insert two batteries.
2. Aim at switch board when operating the remote control
3. Push button to choose speed, Mode, Swing, Timer or turn off.

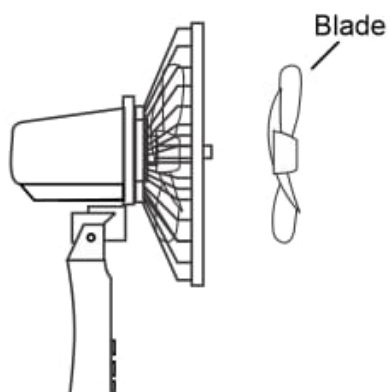

Unscrew the blade cap by turning clockwise & rear guard mounting nut by turning counter clockwise

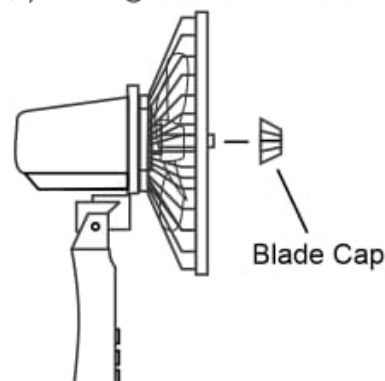

Put rear grille on motor shaft and secure with guard nut.

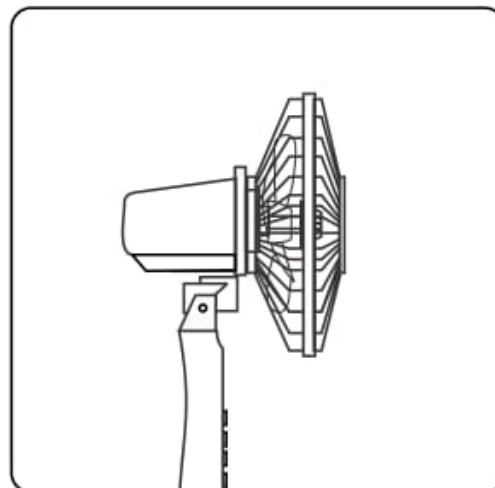

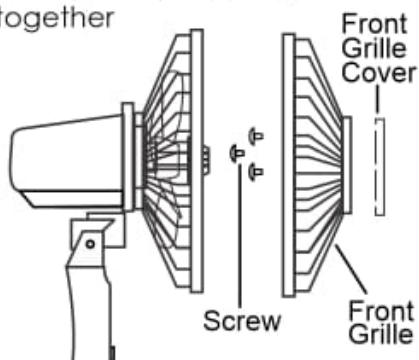

Slide blade on motor shaft

Screw blade cap on shaft by turning counter clockwise

Screw front Grille cover to front grille, then close both rear and front grille by clipping them together

MAINTENANCE TIPS

1. Before cleaning, unplug fan first.
2. Clean the fan with soft cloth and neutral detergent, but not gasoline or other solutions.
3. Add a few drop of high quality lubricating oil to bearing of the motor before the first operation every year.
